Natural pain relief, made in Aotearoa.

X-ZONE is a family of herbal rubs, sprays and roll-ons built on eleven native New Zealand healing herbs. The brand should feel like where it comes from: the bush, the water, real people who move.

Backed by science. Powered by plants.

The brand line. Always these five words, always this order, full stops included. "11 NZ healing herbs" is the supporting proof point and may sit beneath it.

Personality: honest, outdoorsy, knowledgeable, warm. Never clinical, never hype.

01 LOGO

Primary: green on white

Reversed: white on Bush Deep or on a photo with green wash

Icon: the koru X, used alone for avatars and favicons

- Clear space all round equals the height of the X.
- Social avatar is the icon in black on a white circle, no ring.
- Never recolour, outline, add a shadow, or stretch.
- Minimum width 30 mm in print, 120 px on screen. Below that, use the icon.
- The icon may be used as a watermark at 8 to 12% opacity on green.
- Never place on a busy photo without the green wash behind it.

02 COLOUR

Bush Deep	**Bush**	**Sun**	**Ember**	**Mint**	**Coal**
#113619	#1e4d27	#fbcd0a	#e8471f	#e2f5eb	#171717
Primary ground	Bands, pills, links	One accent, used sparingly	Sports range only, small	Light tint, panels	Body text

60% green | **30% white** | **10%**

Green is the brand. White gives it air. Yellow points at one thing per layout: a subline, a number, a rule. Never two yellow elements competing. No blue, no navy: it reads as pharmacy, not bush.

03 TYPOGRAPHY

Why rub it in, not just rub it on

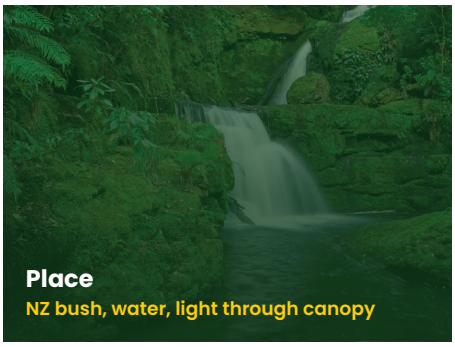

Poppins SemiBold for sublines and names

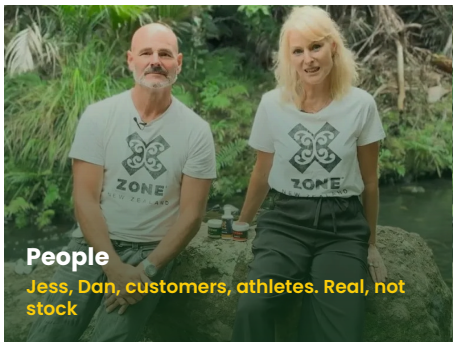

Open Sans Regular for body copy, captions and anything longer than two lines. Keep lines to about 65 characters.

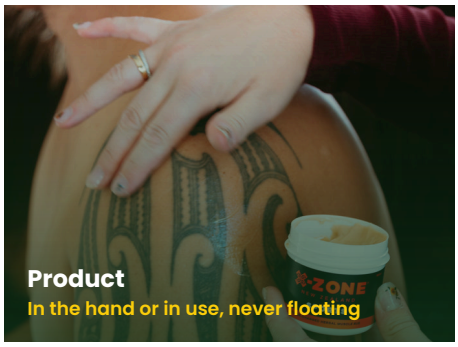

OPEN SANS BOLD, SPACED, FOR LABELS

DISPLAY	**Poppins ExtraBold / Bold**, sentence case, tight leading (1.05). Headlines ask a question or state one fact.
BODY	**Open Sans Regular**, 1.45 leading. SemiBold for emphasis, never italic.
LABELS	**Open Sans Bold**, uppercase, 1.6 pt tracking, 7 to 8 pt.
FALLBACK	**Arial** in email signatures and Office documents, where web fonts will not load.
CASE	Sentence case everywhere. ALL CAPS only for short labels, never for headlines or taglines.

04 PHOTOGRAPHY

- Natural light, green and earth tones, nothing colour-graded warm or blue.
- Show the body part the product is for: ankle, knee, shoulder, hands.
- When text sits on a photo, apply the green wash: Bush Deep at 15% top to 75% bottom.
- No gym stock imagery, no white studio backgrounds, no AI-generated people.

05 VOICE

Sound like this

- Teach first. Explain why the herb works, what the bruise colour means, what to do in the first 48 hours.
- Plain and warm. Short sentences. Kiwi, not corporate.
- Te reo greetings are part of the voice: Kia ora, Ngā mihi, Aotearoa.
- Name the eleven herbs. They are the proof.

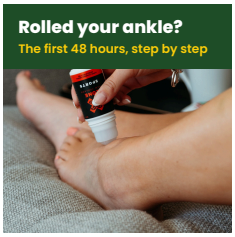

Not like this

- No miracle claims. "Supports", "helps", "traditionally used", never "cures".
- No price-only posts, ever. A special sits inside something useful.
- No exclamation marks in headlines, no emoji in body copy.
- No "clinically proven" unless the independent test is linked.

The 80/20 rule. Four in five posts educate: herb science, injury first aid, wellness. One in five sells, and even that one is anchored in a reason to use the product.

06 INSTAGRAM SYSTEM

Green-ground post (top) and photo-led post (bottom). Alternate them down the grid.

1. **Avatar.** Black koru X on a white circle. Never the full logo.
2. **Green-ground post.** Bush photo under a green wash, white logo top left, yellow range pill top right, headline bottom left in Poppins ExtraBold with a yellow subline, footer strip with handle and site.
3. **Photo-led post.** Real photo full bleed, green title band across the top: white headline, yellow subline. Nothing else on the image.
4. **Grid rhythm.** Alternate green-ground and photo-led so the grid reads as one brand at a glance. Same logo position, same two fonts, same yellow, every time.
5. **Reels.** Shot like a film, not a slideshow: slow camera moves, cross-dissolves, grain, a few words on screen, no voiceover unless it is Jess or Dan. Cover frame follows the green-ground post.
6. **Captions.** First line is the lesson. Product mention last. Hashtags: five at most, Aotearoa and herb names before generic pain tags.
